

Technical specifications and price list EUR - 2017

valid to 31.12.2017

Major dimensions

Length of hull	8.00 m
Width of hull	2.45 m
Draught hull/Z drive	0.40/0.80 m
Displacement	1600 kg
Crew max.	10 people
Engine	Mercruiser Bravo3
Engine type	TDI 265-6 / 2967 cm ³
Max. Power	265 HP/195 kW (4200)
Max. Torque	550 Nm (2000)
CE-Norm	Kat. C

Shell

Composite construction in high-grade structural foam with low alkali glass skin. Lamination designed for maximum rigidity with minimum weight. All horizontal surfaces (deck, flooring, seats, engine compartment, etc.) are covered in solid teak slats and trim. Coaming in solid teak. Self-draining anchor locker in foredeck. Rubbing strake in aluminium with hard-rubber insert. Below waterline: treated with VC-Tar and VC-17m. Entire boat is self-draining!

Fittings

Five hinged design cleats, stem eye in bow. Flush fitting stainless steel hinges and hatch fastenings. Extendible telescopic stainless steel bathing ladder in stern. Chromium steel safety grab handles in stern.

Deck layout / cockpit

Central dual steering column with folding seat. Centrally grouped seating consisting of rear-facing two-person bench, fold-down seats on each side of boat, seating on engine compartment and slot-in cockpit table (total seating for six people at table). Icebox under bench. Large sunpads in bow and over engine compartment. Walk-in helm station with emergency WC. Large stowage spaces under sunpads and below benches. Wraparound handrails in anodised aluminium tubing.

Technical equipment

Safe-T-QC steering. Dual-lever speed controls. Separate engine and starter batteries. LED navigation lights. Watertight instrument panel with stainless steel controls and LEDs. 12V sockets. Interior lighting for large stowage spaces.

Paintwork

All paintwork with ALEXSEAL system. Color of inner and outer shell to customer requirements (ALEXSEAL color range). Special paintwork see 'Options'.

Engine

Mercruiser TDI-V6-265 with Bravo Three Z drive (twin propellers).

EUR 184'900

Export price (excluding VAT, customs duties and other taxes), CE certification, supplied ready to sail ex boatyard

Options		EUR ¹
GPS chart plotter / Engine Data Integration	VDO 11 cse color chart plotter (GPS) with engine data integration incl. GPS antenna and engine data interface. Incl. installation	4250
Upholstery	Made-to-measure upholstery for bow and stern sunpads and for pilot's seat and central bench. Colour as required from colour swatch	1300 – 3500
Freshwater system	45-litre freshwater tank with pressure pump and stern shower	1500
Warm water system	Warm water for stern shower. Water heated via engine cooling system, plus 220V heater. Together with freshwater system	1500
Audio system	Car radio/CD/MP3 integrated in instrument panel, waterproof 80W marine speakers, built into in helm station. Special equipment on request.	1150
Courtesy lights	Two individually-switchable groups of LEDs providing discreet non-dazzle lighting at foot level	incl.
Underwater lights	Underwater spotlights built into stern to illuminate water around the boat. Ideal when casting anchor or diving in a bay at night and as decoration in port	2700
Automatic MOB system/ electronic immobiliser	Radio-operated man-overboard system (MOB) that immediately switches off the engine if helmsman should fall overboard. Also ideal as anti-theft immobiliser as engine can only be started if signal generator is within radio range	1250
GPS tracking	Provides instant information on current location of your boat. Accessed via Internet or SMS text messaging. Automatically sends SMS message as soon as boat travels beyond a pre-defined radius from its intended location (geo fencing)	1710
Two-tone paintwork / special finishes (metallic)	Two-tone paintwork. Special lacquers and paints and multi-layer metallic finishes	2000 – 3500
Hardtop	Hardtop construction on two supports slotted into central bench with roof and glass panorama section. Wraparound handrails. Towing eye on rear edge for wakeboarding. Top light/anchor light mounted on roof	18500
Roof lighting	LEDs and spots built into roof over helm station and central seating area	1000
Awning (Add-on to Hardtop)	Awning for shade over seating area and stern sundeck. Fixed at front to roof construction, supported at rear by telescopic aluminium masts that slot into edge of coaming. Only available in conjunction with hardtop	2000
Awning (Stand-alone)	Awning for shade over driver's seat and seating area. Version for boats without hardtop	800
Refrigeration unit	12V compressor unit for cooling the insulated icebox under the central bench. Includes thermostat and control unit	1280
Rear View Camera	Rear View Camera built into roof (needs hardtop and GPS Map option)	1850
230V AC shore connect	230V AC shore connect with fix mounted automatic battery charger for batteries.	1550
12V/230V DC/AC	Generates 230V on-board power to operate 230V appliances	on request
Inflatable big boat fenders	Large-volume inflatable fenders. Only in combination with compressed air system	on request
Compressed air system	230V compressor unit fitted in Systainer. Rapid inflation of inflatable fenders and towing toys (bananas, sliders, etc.). Requires DC/AC transformer	on request
Tarpaulin	Full multi-section tarpaulin in Stamoid light	2750
Road trailer	Road trailer with slip equipment (special finish Tender o8)	4850
